

**Healthy Minds Policy Initiative
Oklahoma’s Behavioral Health Workforce Study
Acknowledgement of Key Stakeholders**

Healthy Minds Policy Initiative, along with our partner TriWest Group, would like to acknowledge and thank the following stakeholders for participating in interviews for the behavioral health workforce project. We wanted this project to be informed both by data and the experiences of key Oklahoma stakeholders—leaders of provider organizations, individuals who provide direct care to people in need every day, faculty and supervisors training the future workforce, and people contributing to workforce development efforts through policy work. We greatly value your time, perspectives, and experiences with these critical behavioral health workforce issues. Your input helped inform this series of briefs on Oklahoma’s Behavioral Health Workforce [*insert hyperlink*], which will be used to support policy opportunities for the coming year. Thank you very much for your time and contributions.
